REPORT OF THE BOARD OF MANAGEMENT

for year ended 31st December, 1944

THE Board of Management has pleasure in presenting its Annual Report and Statement of Accounts for the Year ended 31st December, 1944.

It is with sincere regret that the Board record the death of one of their Trustees, Major G. A. Gaddum, on active service.

The Board are pleased to report that the work of the hospital, as shown in the general report, has progressed in a satisfactory manner. It will be noticed that though the number of new out-patients and attendances, both at the Manchester and Bowdon out-patient clinics, shows a decrease, the number of Ear, Nose and Throat operations performed at the St. Anne's Home reached the record total of 1,437. Improvements in the sterilizing room at Bowdon having become necessary, the Board decided to instal two new sterilizers and these will be in operation in the near future. It is regretted that owing to shortage of Honorary Staff the out-patient clinic at Bowdon is now open on two mornings each week instead of three. At the Crossley Sanatorium the beds have been fully occupied during the year. The need for the provision of additional beds for the treatment of Pulmonary Tuberculosis has been considered by the Board and will take a prominent place in their post-war planning. The reconditioning of the central heating in the Nurses' Home has been completed and the improved conditions have been greatly appreciated by the staff. The re-equipping of the kitchen with modern apparatus has been commenced and we hope will soon be completed. The alterations already made have made a big improvement in the working conditions in the kitchen.

The Manchester and Salford Convalescent Homes Fund has again given most valuable support. Grateful thanks are also extended to the Oldham Ladies' Committee, Manchester and Salford Medical Charities Fund, Trustees of Booth's Charities, the Manchester Corporation and to all subscribers and donors for their valuable and much-appreciated support.

The Board acknowledges with gratitude the receipt of the following legacies :—

		£	s.	d.
Executors of Evan Roberts	45	0	0
do.	Esther Perkins		9	8
do.	Mrs. Eleanor Shepherd	95	13	9
do.	Mrs. Jane Ash	134	11	5

The appreciation of the Board is extended to all members of the Honorary Medical and Surgical Staff for their valuable services. To the paid Medical Staff, the respective Matrons and all members of the Nursing Staff, we express our deep appreciation for the manner in which they have carried out their exacting duties.

Messrs. Litton, Pownall, Blakey & Higson have again acted as Honorary Auditors and the Board take this opportunity of conveying to them their best thanks.

Expenditure continues to rise and in the coming years a considerable sum will have to be provided for various renewals and repairs to buildings and plant which have had to be delayed through existing conditions.

The Board appeal for increased support to enable them to maintain the high standard of the Institution.

GENERAL REPORT

Year ended 31st December, 1944.

Manchester.

The number of attendances at the out-patient Clinic in Hardman Street has been slightly smaller than in 1943, the number of new out-patients having fallen by ten. This decrease is possibly accounted for by the closure of the Saturday morning Clinic. Details of the attendances will be found in the statistical tables in the report.

St. Anne's Home, Bowdon.

A successful year's work can be reported from this Branch. Like Manchester, however, the number of out-patient attendances shows a small decrease. Unfortunately, through the increasing demands on the Honorary Staff, the out-patient Clinic is now only open on two mornings each week instead of

three. Throughout the year the number of occupied beds shows an increase over 1943 and the number of Ear, Nose and Throat operations performed was the record high one of 1437. A detailed list of the operations performed follows :—

Aspiration of Cervical Glands	9
Aural Polypi	11
Bronchoscopy	1
Denker Operations or Caldwell Luc	18
Dental Extractions	3
Direct Laryngoscopy	6
Dissection of Glands	2
Ethmoids	6
Frontal Sinus	1
Intranasal Antrostomy	38
Mastoids	24
Nasal Polypi	57
Oesophagoscopy	15
Paracentesis	7
Plastic Operation on Nose	4
Plastic Operation on Ear	2
Removal of Cyst from Vocal Cord	2
Removal of Pappiloma from Vocal Cord	2
Removal of Maxillary Cyst	5
Removal of Foreign Bodies	2
Septum Operations	86
Tonsils and Adenoids	1117
Tracheotomy	2
Turbinectomies	4
Miscellaneous	13
					—
TOTAL					1437
					—

The increase of work in the in-patient department has greatly added to the duties of the nursing staff, especially the Matron and Sisters, who however, have cheerfully undertaken this extra responsibility.

Crossley Sanatorium, Delamere.

The constant demand for additional beds both from the corporations sending patients to the Sanatorium, and from private patients, has resulted in all available beds remaining occupied throughout the year. The type of patient admitted has been, as in the last three or four years, of more advanced type. Whilst the number of patients admitted and discharged is almost identical with last year, there has been a further slight increase of the period of treatment required for each individual patient.

An addition to this year's report is the employment of ex-patients as colonists doing duties as porters and gardeners. The employment of these ex-patients is not intended to be of a permanent nature but is simply to provide intermediary employment under ideal conditions to bridge the gap between their active treatment in hospital as patients, and their return to civil employment outside.

Age and Sex of Admissions.

<i>Age</i>	<i>Males</i>	<i>Females</i>	<i>Total</i>
15—20 years	8 (7)	22 (11)	30 (18)
21—25 years	9 (10)	23 (30)	32 (40)
26—30 years	4 (10)	13 (11)	17 (21)
31—35 years	7 (10)	12 (9)	19 (19)
36—40 years	7 (6)	5 (8)	12 (14)
41—45 years	8 (9)	2 (1)	10 (10)
46—50 years	7 (5)	1 (1)	8 (6)
51—55 years	4 (3)	— (2)	4 (5)
Over 55 years...	1 (—)	(1) —	2 (—)
	55 (60)	79 (73)	134 (133)

Comparing the above table with corresponding figures for 1943 (in brackets) shows that the number of male patients admitted has decreased, whilst the number of female patients has increased. Consideration of the male figures shows that this decrease is not general, but is present only up to age 35, above this age there is in fact an increase in the number of cases. This is accounted for in two ways :

1. There has been an increase in the number of elderly cases in civil employment, probably due to the long strain of war conditions.

2. The lack of beds in other hospitals which normally take more advanced cases has resulted in some of these cases being referred to this Sanatorium.

Females.

In previous years it has been noted that there has been a gradual rise in the incidence of cases in the 15-25 year groups. This year, if the group is again taken as a whole, there is a further rise, but it is interesting to note that there is a much greater rise in the 15-20 year group, and that in fact in the 21-25 group the number of cases is diminished. In other groups the proportions are roughly comparable.

The type of treatment carried out during the year has been as in the past, and the results obtained on patients discharged are as shown below.

Results of Treatment of Patients Discharged.

Summary of Results on Discharge with reference to Sputum.

(a). Routine Treatment only.

70 cases	
Positive on admission	} 16. i.e. 22.85%.
Positive on discharge	
Positive on admission	} 25. i.e. 35.71%.
Negative on discharge	
Negative on admission	} 29. i.e. 41.41%.
Negative on discharge	

The results of routine treatment are on the whole satisfactory. An explanation of those patients discharged with positive sputum is as follows :—

3 were transferred to other hospitals, two for thoracoplasty, and one for a cardiac condition.

5 were chronic cases with extensive lung involment.

6 were discharged at their own request.

2 died.

(b) *Artificial Pneumothorax* 35 cases.

Discharged with Positive Sputum — 2. *i.e.* 5.6%

Discharged with Negative Sputum — 33. *i.e.* 94.4%

There has been an increase in the number of cases in which this form of treatment was carried out, this is almost certainly accounted for by the larger number of young female cases.

Of the two cases in this group with positive sputum, one was discharged at his own request for domestic reasons, and the other died.

(c) *Gold Treatment (Crisalbine)* 12 cases.

Of the total number of cases treated the sputum which had previously been positive became negative in NINE cases.

(d) *Thoracoplasty.* 6 cases.

Discharged with positive sputum — 1.

Discharged with negative sputum — 5.

The case which was discharged with a positive sputum was transferred for a further stage of the operation to be carried out.

(e) *Phrenic Nerve Operations.* 2 cases.

Crushing of the phrenic nerve was carried out in an attempt to obliterate pulmonary cavities and was successful in Two cases in which the sputum finally became negative.

Of the cases remaining positive two were discharged with chronic disease in both lungs and one died.

(f) *Monaldi Cavity Drainage.* 2 cases.

By this form of treatment some slight advantage seemed to be obtained in the initial stage, but this was not maintained, and both cases eventually deteriorated, one died in hospital and the other was returned home in poor condition.

Summary of Treatment Used in 1944 (with regard to discharges)

Routine treatment only — 70 cases.

Surgical treatment —

Artificial pneumothorax	— 35 cases
Phrenic nerve operation	— 5 „
Thoracoplasty	— 6 „
Monaldi cavity drainage	— 2 „

Gold Treatment (Crisalbine) — 12 „

Summary of Gain or Loss in Weight.

Males.

Gained weight	— 39 (73.58%).
Lost weight	— 8 (15.09%).
Stationary	— 2.
Not weighed	— 4.

Average gain in weight of those who gained — 10.26 lbs.

Average loss in weight of those who lost — 4.56 lbs.

Female.

Gained weight	— 60 (76.91%).
Lost weight	— 8 (10.25%).
Stationary	— 1
Not weighed	— 9.

Average gain in weight of those who gained — 9.82 lbs.

Average loss in weight of those who lost — 4.06 lbs.

X-Ray Department.

During the year the total number of X-Ray films taken amounted to 901. In addition to this the X-Ray apparatus is in constant use for fluoroscopy. Minor faults have developed during the year which fortunately were all capable of being dealt with by the hospital staff.

Laboratory.

The routine work of the Laboratory was continued as in the past and is concerned mainly with the bacteriological examination of the sputum. The research on the relationship of plasma viscosity and blood sedimentation was continued, and it is hoped that the results of some of the work will be published in the near future.

Staff.

It is regretted that the slight easing of the position in regard to the Nursing and Domestic staff which was noted towards the end of 1943 was not maintained for long.

Serious difficulties have again arisen in both groups, and the Ministry of Health and Ministry of Labour have been of little or no assistance.

In the Nursing staff the main difficulty is the replacement of younger girls who leave the sanatorium in the normal course of events to take their general training.

In the Domestic staff all the interneers resigned during the year, two to become nurses — as the Ministry of Health informed us had a higher priority — and two to take up domestic duties elsewhere. In the case of all domestics who have left the staff, the Ministry of Labour has confirmed its inability to force them to return, and in the majority of cases has been unable to fill the vacancies.

It is regretted that on this account much of the domestic work in the hospital has had to be carried out by the patients.

To the Matron, and all members of the Nursing and Domestic Staff who remain, every credit should be given for the efficient manner in which they have carried out their duties during an increasingly difficult period.

Visiting Staff.

Throughout the year the visiting surgical, medical and dental staff have continued their regular visits, and to them the hospital extends its thanks for their generous assistance and co-operation.

To the Rev. Mr. Barnes and the Rev. Father Higgins we also express our appreciation for the comfort they have been to the patients and staff throughout the year.

Entertainment.

Early in the year it was decided that some attempt should be made to increase the entertainment to the patients in the hospital, and particularly so in the case of the bed-patients. The solution to this problem appeared to be in the acquisition of a new radio amplifier, microphone and gramophone pick-up. As the hospital authorities had been put to considerable expense in the current year for other improvements, it was felt that the patients themselves might by their own efforts provide the necessary equipment. Consequently as a result of a May Day Procession, two Sales of Work, and donations from several ex-patients, a sufficient fund was obtained to provide all the necessary equipment.

A scheme is now functioning which embodies Play Reading, Gramophone Recitals and Competitions for bed and up patients one evening per week. On one other evening per week entertainment is provided for up patients in the form of Whist Drives, Beetle Drives, etc. Further use is made of the

microphone by broadcasting to the bed patients any Concerts provided by the patients, or provided by outside Concert Parties.

In addition to this the usual film programmes have continued during the winter months and are very much appreciated.

The Bowling Green, which had been re-sown in the autumn of 1943, was sufficiently advanced to allow play from June onwards, and was extensively used by the patients and staff.

Outside entertainments for the patients was provided during the year by visits from the following, to whom we extend our grateful thanks :—

The I.C.I. (Kastner-Kellner) Choir.

The Cestrian Productions Merry Mascots Concert Party.

Occupational Therapy.

The workshop provided last year for the use of the ambulant male patients continues to be used extensively.

After consultation with the female patients as to the type of workshop they would like, two rooms in the basement were adapted for the making, alteration and repair of clothing. A second-hand sewing machine was procured and paid for out of the Canteen Fund, and an electric iron was generously provided by Mr. Hampson, the husband of one of the patients. This workshop has been extensively used and appreciated.

THE MANCHESTER HOSPITAL FOR CONSUMPTION
AND DISEASES OF THE THROAT AND CHEST

Important Notice

to

ANNUAL SUBSCRIBERS

PLEASE SEE OVERLEAF

RECOVERY OF INCOME TAX ON ANNUAL SUBSCRIPTIONS

The Board of Management desire to draw the attention of Annual Subscribers to the advantages to be gained by signing the form on the opposite side.

By filling up this form you add considerable value to your present Subscription, as you will benefit the Hospital to the extent of doubling it. The Hospital will recover this amount from the Income Tax Authorities, but you will still pay the same amount as before.

Will those who are willing to do this kindly fill up and sign the form opposite, and forward it to the Secretary, Manchester Hospital for Consumption, 45 Hardman Street, Manchester, 3.

Subscription Paid	Amount Reclaimed by the Hospital, assuming Income Tax at 10/- in the £	Total Subscription Recorded
£ s. d.	£ s. d.	£ s. d.
1 1 0	1 1 0	2 2 0

10 10 0	10 10 0	21 0 0

AND SO IN PROPORTION.

AGREEMENT TO CONTRIBUTE

TO THE MANCHESTER HOSPITAL FOR CONSUMPTION
AND DISEASES OF THE THROAT AND CHEST

I,

of

.....

hereby agree and promise, that for seven years from the date
hereof, or during my lifetime, whichever period shall be the
shorter, I will pay to the Manchester Hospital for Consump-
tion, on the.....day of.....
each year such an amount, as after the deduction of income
tax, will result in the net sum of.....
being received by the said Hospital, the amount being paid
out of my general fund of taxed income, so that I shall receive
no personal or private benefit from the said Hospital during
either of the said periods.

In witness thereof I have hereunto set my hand and seal
this.....day of.....19

.....
Signed, sealed and
delivered by the said.....

in the presence of.....
